

## INVERTASE ( $\beta$ -Fructofuranosidase) from yeast (Lot 100201c)

### E-INVPD-2G

12/17

(EC 3.2.1.26) beta-D-fructofuranoside fructohydrolase

#### 1. PURITY:

Chromatographically purified. Specific activity 300 U/mg of solid on sucrose (1% w/v) at pH 4.5 and 40°C.

#### 2. CONTAMINANTS:

Activity	Substrate	Contamination (%)
$\alpha$ -Galactosidase	<i>p</i> -nitrophenyl $\alpha$ -galactoside	< 0.001%
$\beta$ -Galactosidase	<i>p</i> -nitrophenyl $\beta$ -galactoside	< 0.001%
$\alpha$ -Glucosidase	<i>p</i> -nitrophenyl $\alpha$ -glucoside	< 0.001%
$\alpha$ -Glucosidase	maltose (2% w/v)	< 0.001%
$\beta$ -Glucosidase	<i>p</i> -nitrophenyl $\beta$ -glucoside	< 0.001%

#### 3. PHYSICOCHEMICAL PROPERTIES:

pH Optima:	4.5
pH Stability:	3.5 - 8.0
Temperature Optima:	60°C
Temperature Stability:	< 60°C

#### 4. STORAGE CONDITIONS:

The enzyme is supplied as a freeze-dried powder. It should be stored in the presence of dessicant at -20°C.

Allow to warm to room temperature in the presence of dessicant before opening the bottle. Once dissolved, the enzyme can be stored at -20°C.
